ARS CORPORATE is a firm with a dedicated focus on strategic advisory in investment and capital structure related areas, with offices in Barcelona and Madrid. Our core business is mergers & acquisitions, in which our founding partners gathered, since the early nineties, in-depth international experience in national and cross-border transactions.

As independent advisors we guide our clients through projects of takeovers, divestitures, restructuring or fund raising, ensuring proven professional practices and the highest quality standards. Based on our service portfolio we also establish long-term relationships with our clients in the areas of strategic advisory board consulting, pinpointing organizational, investment and market opportunities.

Precision, emphasis on quality and personal approach in all we do is our way of performing in advisory and being a competitive advantage for our clients.

Additionally, with our international network we are able to attend our clients both locally and globally from one source: independently, efficiently, personally and confidentially.
